

## One line title in boldface, 14pt font, Times New Roman

First author, **presenting author**, third author<sup>1</sup>, etc. with presenting author in boldface

Affiliation and address of first institution shortened to one line

<sup>1</sup>Affiliation and address of second institution shortened to one line

e-mail address of corresponding author

The abstract should be a **self-contained description of your results** presented on **one page** in the format specified in this template. Illustration of described results by **figures** and inclusion of **references** is desired but should not take up more than 1/3 of the page. To leave enough room for the communication of your results, restrict title, affiliations and references to one line of text for each.

Use this template as the root document for creating your **abstract in A4 format** and follow the formatting instructions given here. Please **do not change the margins!** Correct formatting is illustrated in the sample PDF abstract.

The text body should be written with centre justification (Blocksatz) while title, authors with affiliations and references are left justified. Use no other fonts and plug-ins than **Times New Roman** for text, **Symbol** for single physical quantities, variables etc. and the **MathType** plug-in (included in the Office software package) for formulae. All text should be written with a **font size of 12 pt** except for the title that should be typed in 14 pt. Insert **figures as bitmaps or png or equivalent** making sure that they are well **reproduced in black and white or color**. References [1] should be numbered by Arabic numerals in square brackets and formatted according to the examples given below.

typical space for figures

- [1] M. Kisiel, E. Gnecco, U. Gysin et al., Nature Materials, 10, (1), (2011)
- [2] G. Fessler, I. Zimmermann, T. Glatzel, Appl. Phys. Lett., 98, (8), (2011)
- [3] S. Kawai, Th. Glatzel, S. Koch, et al., Phys. Rev. B, 83, (3), (2011)
